

THERMOGENESIS

Breadboard Prototype v0.1

Sargon Labs / William Janczewski

CERN-OHL-S-2.0

Notes:

- 5V/VBUS pin inactive on UART USB port
- All components powered from 3.3V LDO
- GY-906 breakout has onboard I2C pull-ups (10k)
- Touch threshold: 27000 (ESP32-S3 raw ADC)
- Sensing: conduction through glass, not IR transmission
